Worked as the Designer's liaison to the costume shop. Having discussed the show with the designer in detail I presented the show to the shop on the first day and made sure drapers were provided with the information they needed.

Sent in the rehearsal items similar to actual garments when rehearsal started. (1). This show was mostly purchased so I kept detailed records about which garments came from where for returns (2).

When the purchased items arrived I organized the fitting room and keep track of what happened in each fitting. I took the notes and pictures for the drapers, making sure notes are detailed and clear (3). Closer to show time I will use the fitting notes to compile a dressing list for wardrobe(4). During tech I kept the notes and communicated with the shop on a daily basis to make sure they were completed before the next performance (5).
